-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Information Disclosure Statement

1. The IDS filed 10/28/03 has been fully considered.

Claim Objections

2. Claim 2 is objected to because of the following informalities: in line 1, "the buffer device" should be --the buffer function--. Please see claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Ong (US 6,812,726 B1).

Ong teaches a semiconductor device comprising a first die 12 having channel and controller functions; and a second die 14 having a buffer function, wherein the first and second dies 12 and 14 are packaged together in the single package and the pins 19 of the single package connect to the first die 12 and the second die 14.

Concerning claim 2, wherein the buffer function comprising a SDRAM, please see column 3, lines 28- 36.

Concerning claims 3 and 4, wherein the single package is a thin quad flat package and/or a ball grid array, please see column 3, lines 15-17.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claims 1-4 above, and further in view of Miyamoto et al. (US 6,611,012 B2)

As per the above discussion, the applied reference teaches substantially all structures and featured as claimed, but fails to teach including a computer system using a disc driver and/or a method of making a disc driver for computer system. Miyamoto

Art Unit: 2815

teach a semiconductor device comprising a chip MF and AD connecting to a microcomputer and CPU, wherein a disc drive of the computer is inherent. Hence, it would have been obvious to one having ordinary skill in the art at the time the invention was made for the applied reference to include a disc drive for computer system for the reasons as taught by Miyamoto, and as is notoriously known.
